### **DETAILED ACTION**

The claims 1-28 are pending in the instant office action.

#### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group II. Claims 1-3, 6-8, 9-12, 16-21 and 27 drawn to screening compound or agent that decrease activities of prostaglandin synthase comprising SEQ ID NO: 2, classified in class 435, subclass 7.72.

Group II. Claims 1, 4-5, 6-8, 13-15, 16, 22-26, 28, drawn to screening compound or agent that decrease activities of prostaglandin synthase comprising SEQ ID NO: 4, classified in class 435, subclass 7.72.

The inventions are distinct, each from the other because of the following reasons:

Inventions in group II and I are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, inventions of group I and II are method steps involving two different prostaglandin synthases (with distinct amino acid sequence with different structures and functions) and produce different outcomes.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1652

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
